Detailed Action

The following is responsive to Applicant's election and amendment received May 10, 2004.

Claims 1-8 and 14-16 are cancelled. New claims 15-17 are added.

Claims 9-13 and 15-17 are currently pending.

Applicant's election of the compound ((S)-(-)-N-(alpha-ethylbenzyl)-3-hydroxy-2-phenylquinoline-4-carboxamide) and benign prostatic hyperplasia, with traverse, is acknowledged. However, since Applicant has not specifically pointed out the alleged errors in the restriction requirement, it is being maintained for reasons already made of record.

Claim Objection(s)

1. Claims 12-13 are objected to because of the following informalities: in claims 12 and 13, line 2, after mammal, the phrase —in need thereof—should be added.

Appropriate correction is required.

Claim Rejection(s)—35 USC 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1614

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 12-13 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by Farina et al., 5,811,553.

Farina et al. disclose a method for treating neurodegenerative disorders in a patient, wherein the method comprises administering to a patient in need thereof an effective amount of a quinoline derivative such as ((S)-(-)-N-(alpha-ethylbenzyl)-3-hydroxy-2-phenylquinoline-4-carboxamide). Please see the abstract; col. 11, lines 1-25; col. 61, Table 3, Example 79.

The claims are anticipated by Farina et al. because Farina et al. disclose administration of an identical active agent to a patient using Applicant's claimed method steps. Therefore, suppression of the production of testosterone and luteinizing hormone would be inherent.

Allowable Subject Matter

Claims 9-11 and 15-17 are free from the prior art because the prior art does not disclose or fairly suggest Applicant's claimed methods.

Conclusion

Claims 12-13 are rejected.
